

Dimensions and technical specification of Mechanical cartridges

General specification - Dimensions and weights								
Type	Filtering surface		Filtering capacity μm	Dimensions [mm]			Technical Specification	Weight [g]
	[sq.in]	[cm ²]		ØD1	ØD2	H		
MFC48	127	820	>20	60	87	138	Mechanical cartridge	480
MFC48S	60,5	390	120	68,5	90	147	Stainless steel cartridge	112

CONSTRUCTION: The wide filtering surface is constituted from a metallic strainer and a pierced sheet with an interposed filtering septum made with porous material, that can stop solid particles up to 20 micron. On both the extremities, the block is already complete of gaskets to ensure sealing with the cup and the plastic cover of the filtering tube.
