

## Strip curtain

*The strip curtain is used to separate premises with similar temperatures and where traffic is dense or where visibility is vital. Used as a back-up for an isothermal door it will cut thermal loss during opening. Dimensions match the clear openings of our doors.*

### Strips

Extruded transparent PVC, can be changed one by one  
 Different versions for positive or negative temperature enclosures  
 Strip dimensions : 200 x 2 mm  
 Coverage 50%

### Suspension system

#### Fixed part

PVC tube fixed to wall or under lintel by hanging PVC rings

#### Moving part

Orange polyethylene articulating shell entirely covering the fixed tube and to which are attached the strips

#### Fastening

Single strips are easily replaced by means of the stainless steel nuts and bolts system.

### Options

Coverage 80% or 100 %  
 Strip dimensions : 300 x 3 mm
